

Mukesh Kumar *Full Stack MERN Developer*

mg328790@gmail.com | +91 8292196144 | Gurugram, Haryana | LinkedIn | Portfolio | GitHub

Summary

Full Stack MERN Developer with 2+ years of experience building scalable, high-performance web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in JavaScript, TypeScript, and modern UI technologies, with a strong focus on responsive design, performance, and secure architecture. Passionate about solving real-world problems and exploring Generative AI to build intelligent applications.

Professional Experience

Frontend Developer

11/2025 – Present

Baofeng India 

- Working as a Frontend Developer for the past 6 months, developing responsive and user-friendly web applications using React.js, Tailwind CSS, and TypeScript.
- Building reusable UI components, optimizing frontend performance, and implementing modern web development practices.
- Collaborating with backend developers to integrate REST APIs and deliver seamless user experiences across different devices.

Full Stack MERN Developer

07/2024 – 07/2025 | Remote

Your-hive.com 

- Built and maintained a full-stack web application from scratch using React, Node.js, Express.js, and MongoDB.
- Built RESTful APIs and implemented JWT- and Auth0-based authentication for secure user access.
- Designed responsive UI components using Tailwind CSS, improving usability across devices.
- Deployed production-ready applications, ensuring scalability, security, and performance optimization.

Frontend Developer

12/2023 – 05/2024 | Remote

Champhunt 

- Built responsive and reusable UI components using React.js and Tailwind CSS to ensure scalability and maintainability.
- Improved React frontend performance by reducing unnecessary re-renders and optimizing component loading times.

Skills

Full Stack MERN Development

HTML, CSS, JavaScript, TypeScript, React.js, Redux Toolkit, Tailwind CSS, Next.js, Framer Motion, GSAP, Node.js, Express.js, MongoDB, Git, GitHub, Netlify, Vercel, Render, AWS, Docker

Projects

StudyNotion | MERN Stack EdTech Platform

- Built a scalable full-stack EdTech platform using the MERN stack with role-based authentication and authorization, JWT-secured REST APIs, and separate dashboards for Students, Instructors, and Admins.
- Implemented secure OTP-based authentication, password reset flow, and Razorpay payment gateway integration with backend payment verification and protected transactions.
- Built core learning features including course creation and management, section/subsection handling, video lecture uploads, course progress tracking, ratings & reviews, and instructor dashboards.
- Designed a scalable backend architecture with optimized MongoDB queries and modular REST APIs, reducing API response time and supporting 1000+ concurrent users securely through rate limiting and middleware-based access control.
- Created a fully responsive frontend using React.js, Redux Toolkit, Tailwind CSS, and Vite; integrated Cloudinary for media storage; and deployed the application to Netlify, Render, and MongoDB Atlas.

Education

Full Stack MERN Development

06/2023 – 06/2024 | Online

Prepleaf by Masai 

Bachelor of Arts

03/2022 – 03/2025 | Uttar Pradesh

Swami Vivekanand Subharti University
